## Flojet Bottled Water System *Plus* FOR HOME AND COMMERCIAL APPLIANCES

*The Bottled Water System Plus is part of Flojet's premium water dispensing product line.*

When a water bottle is connected to the system, fresh water is available for use with coffee/tea machines, water dispensers, refrigerators, ice makers, or any other application where portable potable water is needed.

The Bottled Water System Plus is also designed for convenience—the pump shuts off when the water source is depleted, and when water is restored, the pump will automatically restart. This eliminates the chance of any damage to the appliance running dry.
